EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Paul R. Katterle on December 16, 2005.

2. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 18-29 have been renumbered 17-28.

3. Drawing filed on November 18, 2003 has been accepted by the Examiner.

REASONS FOR ALLOWANCE

4. Claims 16 and 18-29 are allowed.

5. The following is an examiner's statement of reasons for allowance:

Vogel et al. (US 6,739,179) disclosed a device for measuring oxygen concentration in gases with two springs and a sample body. However Vogel et al. failed to disclose a plurality of springs each having an elongation axis and comprising a connecting leg connected to a plurality of turns, wherein each of said springs, said connecting leg does not extend in the same direction as the elongation axis; a first pair of springs disposed on opposite sides of the sample body with connecting legs being substantially aligned along a first axis; a second pair of springs disposed on opposite sides of the sample body with connecting legs being substantially aligned along a second axis; and wherein the first and second axes are disposed at approximately right angles to each other.

The aforementioned limitations and the arrangements thereof are not taught in the prior art. In light of the foregoing, the claims of present application are found to be patentable over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mariano Sy whose telephone number is 571-272-7126. The examiner can normally be reached on Mon.-Fri. from 8:30 A.M. to 2:30 P.M.

Art Unit: 3683

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James McClellan, can be reached on 571-272-6786. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
